VENDOR SELECTION

Selecting right vendor who are able to implement the product as per user expectations.

PROJECT MANAGEMENT

Our Project management experts will ensure that the solution is implemented on time and on budget as per the requirements.

INFORMATION TECHNOLOGY SOLUTIONS THAT WORK FOR YOUR BUSINESS

ERP is a critical application for any organization. It is very important to understand the organization requirements and translate the same in way the implementer understands. Considering several modules in ERP system and many inter-relationships between the products, a very thorough knowledge of ERP system and implementation experience is critical to the successful ERP implementation.

Rainbow ERP implementation team has the experience of successfully implementing ERP system for several vendors. The thorough understanding of the finance, business and product aspects makes our team well suited to help organizations in their ERP journey.
